

▶ The Hagglund BV206 FA Fire Attack All Terrain Vehicle (ATV) is a tremendous weapon when it comes to tackling fires in areas inaccessible to normal appliances e.g. woodland or rough terrain.

Being driven by all four tracks and powered by either a Ford V6 or Mercedes 5 Cylinder Turbo Charged Diesel there is nothing to beat the BV206 for being able to cross rough terrain and gradients up to 60 degrees.

Mated to a high efficiency fogging system, the BV206 FA is capable of delivering water or foam to a large area due to it's 100 Gallon capacity and efficient water/foam delivery system.

With a four man crew this vehicle is capable of tremendous fire fighting capabilities.
